
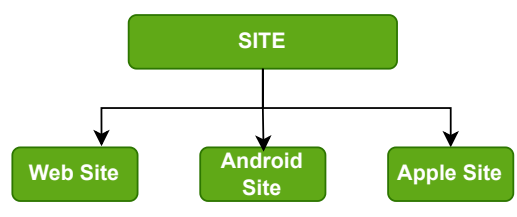
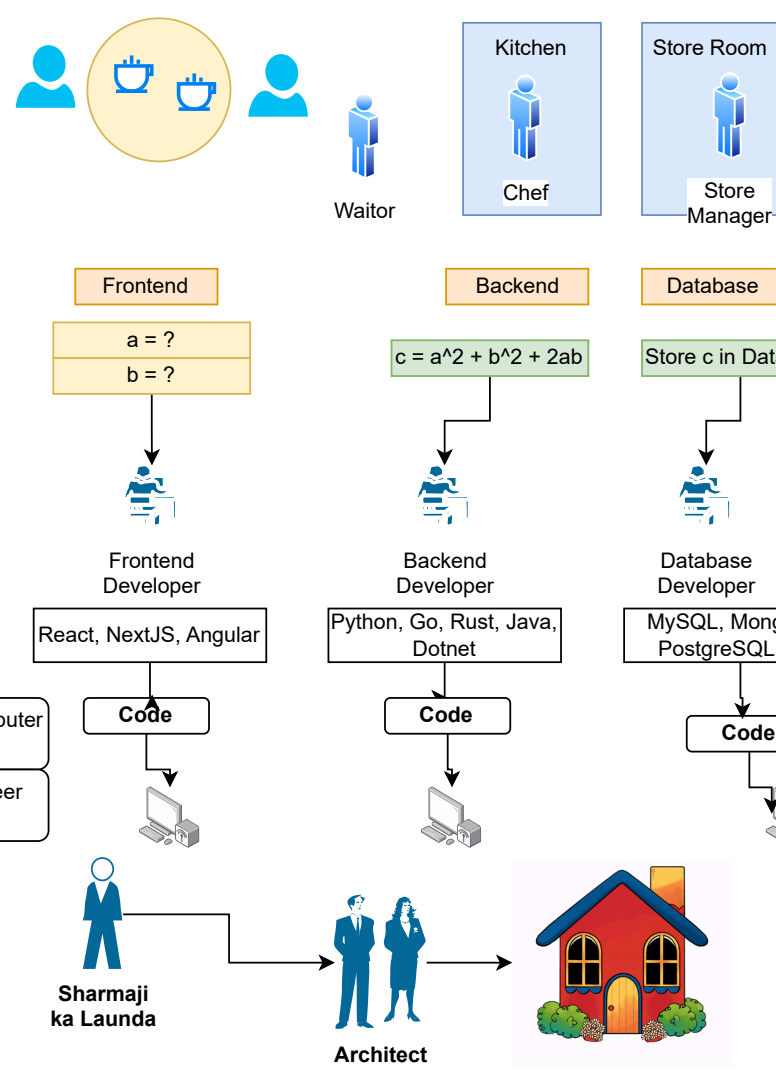
Duniya me aisa kona nahi hai jaha IT nahi ghus sakta...

UI design karne wala aadmi ko UX designer bolte hai...



3 Tier Architecture



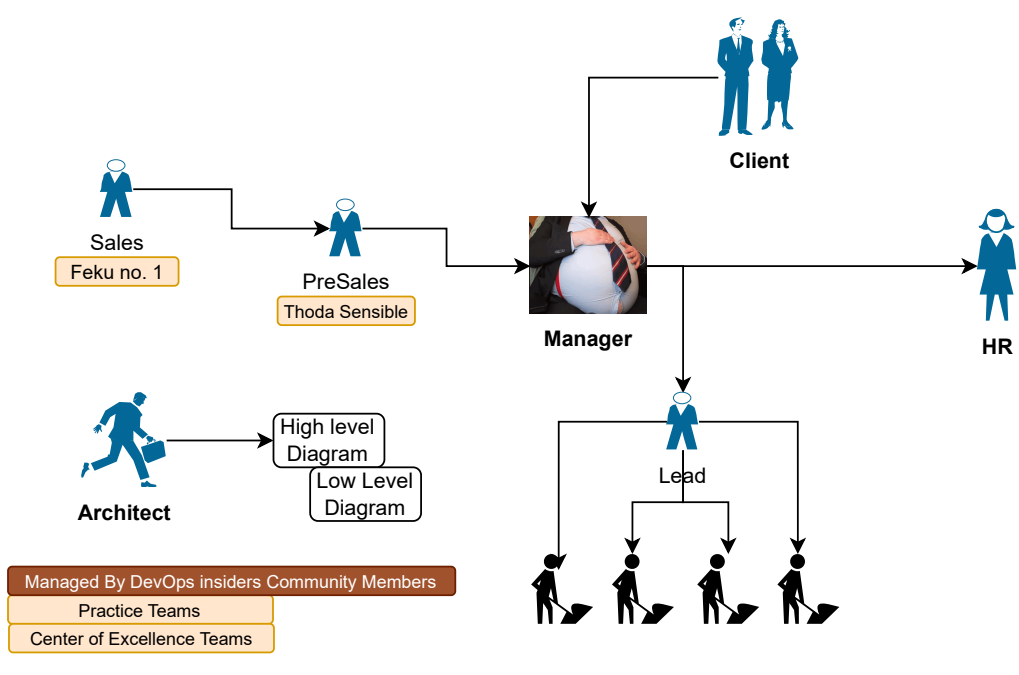
IT me architecture diagram ko Landing Zone bolte hai..

Developer ke banae hue code ko

Security | Backup | DR | Governance | Compliance | Best practices

ke saath Landing Zone pe rakh dene ke kaam ko DevSecOps Engineer Bolte hai..

Customer requirement dega..



Customer ke piche bhago,
Manager khud aapke piche bhawro ki tarah aaega..

Document Flow

Responsible, Accountable, Consulted, Informed
RACI
Statement of Work (SOW)

Requirement ko break down kr dia jata hai userstories me
Sprint Planning Call
Sprint=21 din jaise week = 7 din, month= 30 din
User Story ko task me break karte hai..
Developer ko assign karte hai..
and Ye sara tracking JIRA, Azure Board pr kia jata hai..

Developer sara code bana ke GitHub pr pahucha dete hai..

3 Tier Architecture

Frontend | Backend | Database

2 Tier Architecture

Frontend + Backend | Database

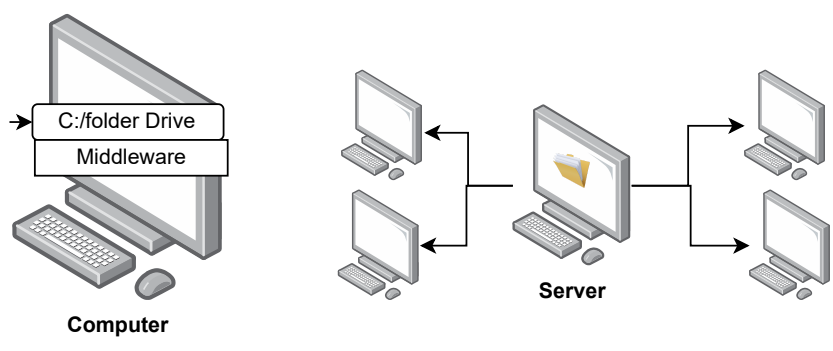
1 Tier Architecture = Streamflix

Frontend + Backend + Database

https://github.com/devopsinsiders/StreamFlix.git

Developer ne **1 Tier app** ka code bana dia and usko github pr dalke link de dia..

Deployment



Stream flix app ko kaha kaha deploy kar sakte hai..

Local Windows Computer | Killerkoda linux Computer | DevOps Insiders Cloud | Microsoft Azure | AWS | GCP
