

Axion Systems jo ek application hai isko deploy krne ke lie virtualised infra bana rahe hai..

Child Parent module foreach map of objects use karke pura infra bana dia..

Is code ko github pr trunk based branching strategy me rakh dia..

pehle clone krke feature branch banaya, fir feature me push kia... feature se classic pipeline chala usse scan and plan chala, PR raise kia, reviewer se review kia and merge kr dia..

Classic me no Maja, YAML me maja hai..

YAML pdna start kia...
