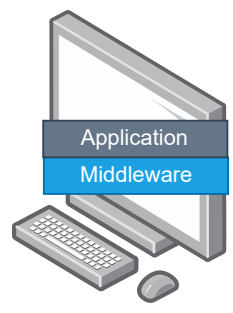
3 Tier Architecture ke baare me padna chalu kardo ✓

1 Tier Architecture Deployment

Windows (IIS)

Linux(Nginx)



Computer Kaha se le?

- Khud ka laptop
- Killerkoda
- OnPrem
- Cloud
  - Azure
    - **Manual**
      - **Azure Portal**
        - Document dekhke bana lenge
    - **Automation**
      - Imperative
        - **Az CLI**
          - Install Az Cli
          - az --help
          - az login
          - **Create RG**
      - Declarative
        - **Terraform**
          - Install Terraform
          - Install VSCode
          - Enable Terraform Extention
          - Create Folder
          - Create 1 .tf file
          - Install Provider
          - HCL Block ka code lana pdega from Terraform Registry
          - cd karke folder me jaenge jaha .tf hai
          - terraform init
          - Terraform provider ko download karke .terraform me rakh dega and .lock file bana ke lock kar dega version ko
          - Ghar se niklte hi thode dur chlte hi, raste me hai sweety ka ghar..
          - Uske lie sundr bn jaenge terraform fmt, validate
          - FMT - Code sajaega, Validate - Sntax check karega..
          - az login
          - terraform plan
          - Plan karenge kya kya banana hai..
          - terraform apply
          - Puchega pakka? aur bana dega resource..
        - **Bicep**
        - **ARM**
  - AWS
  - GCP

Code hi Satya hai..

Terraform State

Terraform Code(.tf file)

```
resource "sona-rg" {}
```

Terraform Plan

- .tf files ko search kia..
- uske andar ke resource blocks dhhondhega
- Compare code and dimag

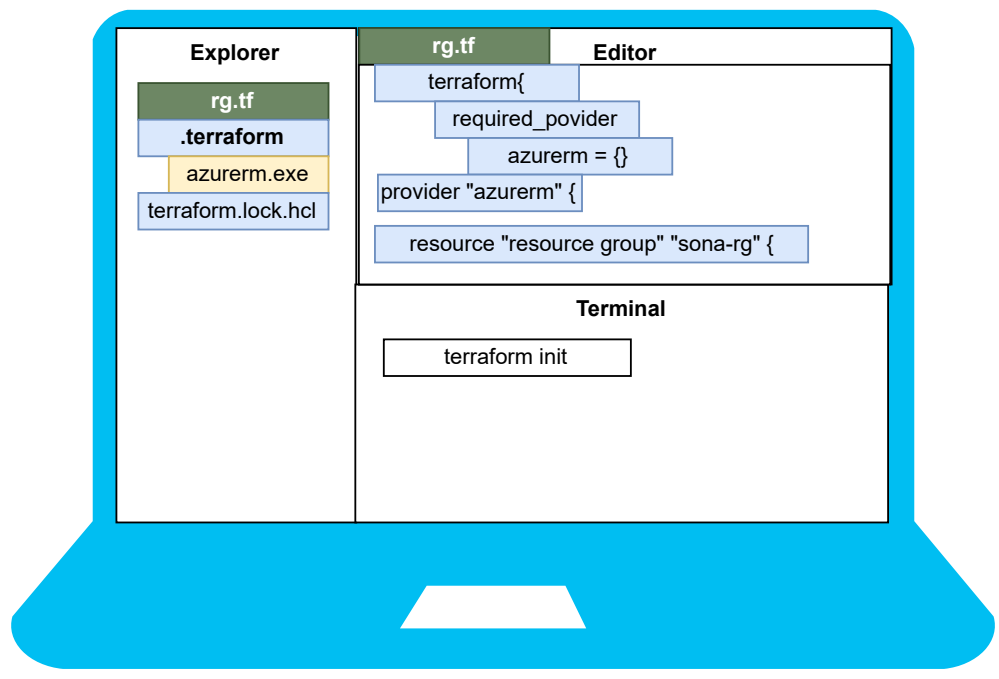
Dairy/Dimag - .tfstate

```
resource "sona-rg" {}
```

Azure Cloud

```
resource "sona-rg" {}
```

If Code = Dimag = Cloud, Zero Drift State



Terraform Init

- .tf files ko search kia..
- .tf file ke andar me se terraform block ko dhhondh ke nikala
- jo bhi provider ki detail thi vo provider ko google se download karke .terraform folder me rakh dia..
- Jo bhi version aapne .tf file me specify kia tha usko lock kar dia..

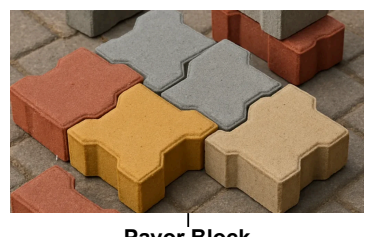
Terraform is just different type of blocks

- Terraform {}
- Provider {}
- Resource Block {}
  - "resource gruop"
  - "storage account"
  - azurerm resource group terraform

Jab jab aapko cloud pr resource banana padega toh resource block use karna padega..

Eita - Brick Block

Diwal



Pavor Block

Flooring
