

1. Babu hamre paas
- Maa ka aashirwaad hai...
- Landing Zone basic banana sikh lia..
- Ek RG, Vnet, Subnet, VM with Public IP terraform se banana sikh lia
- Azure Repo pr Trunk based branching strategy se push kar denge..
- Hum jaise hi feature branch me push kare automatic pipeline chale aur scan stage chale aur plan stage chale YAML me..
- Jo bhi developer terraform ka code develop kia hai us plan ko check kare aur plan ko check karke PR raise karde aur ek reviewer set karde...
- Ab reviewer usko review kare review karke approve krke merge karde toh code main branch me chala jaega..
- jaise hi main branch me jaega firse automatic pipeline chalega aur terraform scan, init, validate, fmt, plan, manual approval and apply..

- feature branch se plan stage chalega..
- main branch se plan aur apply dono chlega..
- Pipelinewa likhne ke lie microsoft documentwa deta hai.. vo documentwa ko padenge.. aur pipelinewa likhenge...

- Door rehne wali chize
- Free ka Paisa..
- Affair.. (Ladki / Ladke ka chakkar)
- Nazdik rehne wali chize
- DevOps insiders ka free ka gyan..
