

Job Oriented Dimag me rakh ke albala ke mat pado..

Padna kaise hai?

Plan bana ke daily dairy likho, Jo bhi tool uthao apne khud ke dimag se fodd do..

1. Terraform + Azure
2. Git + Pipeline

DevOps Insiders ka naam kisi bhi company me nahi lena hai... Kisi ko nahi pta chlna chahiye ki pad ke aae hai... **sbko Igna chahiye ki bahut saalo se DevOps me aag lga rakhi hai..**

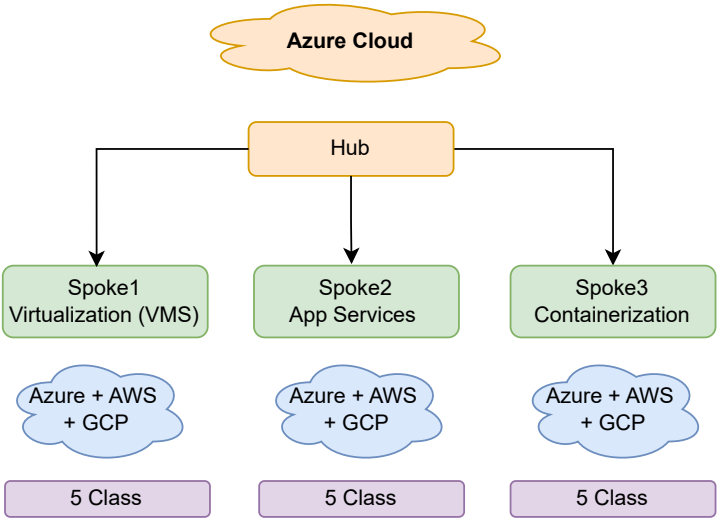

Jaruri nahi hai ki walkin me hi job lena hai..

Jinko abhi bhi call nahi aa rahe, location bangalore kardo naukri.com me...

Interview me kabhi grouping bana ke nahi jao.. Sb individual dikho.. ek dum anjan..

Patience lao, Tention nahi lo result ka...

Azure Repo
Terraform

Azure Pipeline

Azure Cloud

Scan

Plan

Manual Approval + Apply

1. Scan Stage

1.1 tfint, tfsec, opencost

Pehle local pr sare tools ka command nikal lenge aur fir isko pipeline me set kar denge..

1.2 Jo Jo chiz repeat hoga usko pipeline variable me set kar denge

1.3 Agar same pipeline me use krna hai toh pipelien variable, agar multiple pipeline me use krna hai toh variable groups

1.4 Dev aur prod ka infra set kar denge

1.5 Problem dhoondhenge aur ek hi pipeline se parameterised kr denge..

1.6 Jo jo parallel chala skte hai, unko parallel chla denge...

1.7 Jo jo repeat ho raha hai, template bana denge..

1.8 Pipeline troubleshooting

Scan

1.1 tfint, tfsec, checkov, trivy, opencost, gitleaks

Koi bhi tool ko use karna hai?

1. Installation

2. Command

1. Open GitHub tfint

2. Release page

3. Waha se apne computer ke hisab se .exe file ko download kar lenge..

4. Jaha bhi .exe file rakhi hai us folder ko PATH me set kar denge.

```
eq(variables['Build.SourceBranch'], 'refs/heads/main')
```
