

VM using one click fir se karenge

Tfvars bhi nahi banana pde?
1. user Input excel sheet se leke landing zone bn jae
2. Ek chatbot bana de, chatbot input leke terraform se bana de piche me

Ye hardcoded kia hua password bewafaa hai.. 🙄

Secret Scanning Tools

trufflehog

gitleaks

GitGuardian

detect-secrets

Local Computer pr secret ka report nikal ke kaise fix karenge

Secret ko rakhne ke lie keyvault banana pdega

Key vault banake secret ko rakhna pdega, waha se data block laga ke vm ke code me integrate karna pdega

Aaj ka Agenda

Revise One Click Deployment

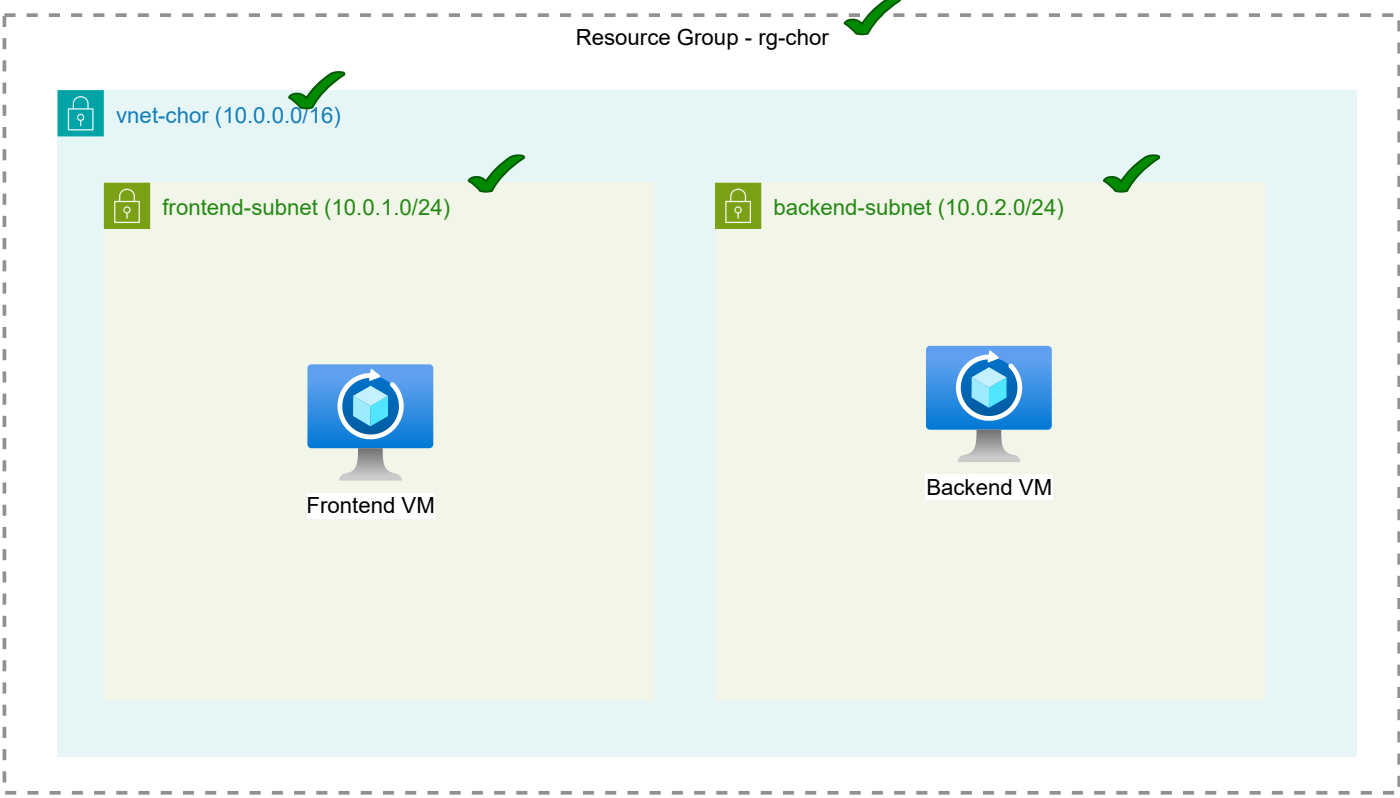

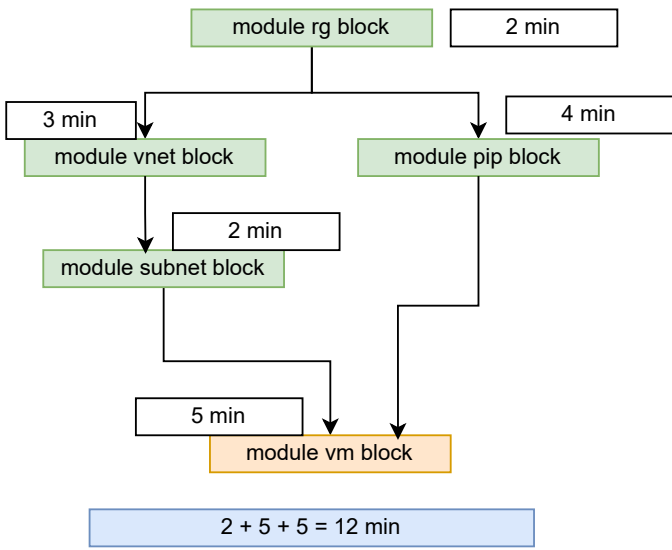

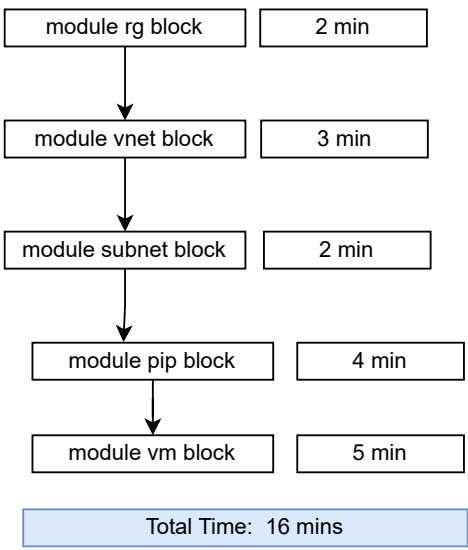

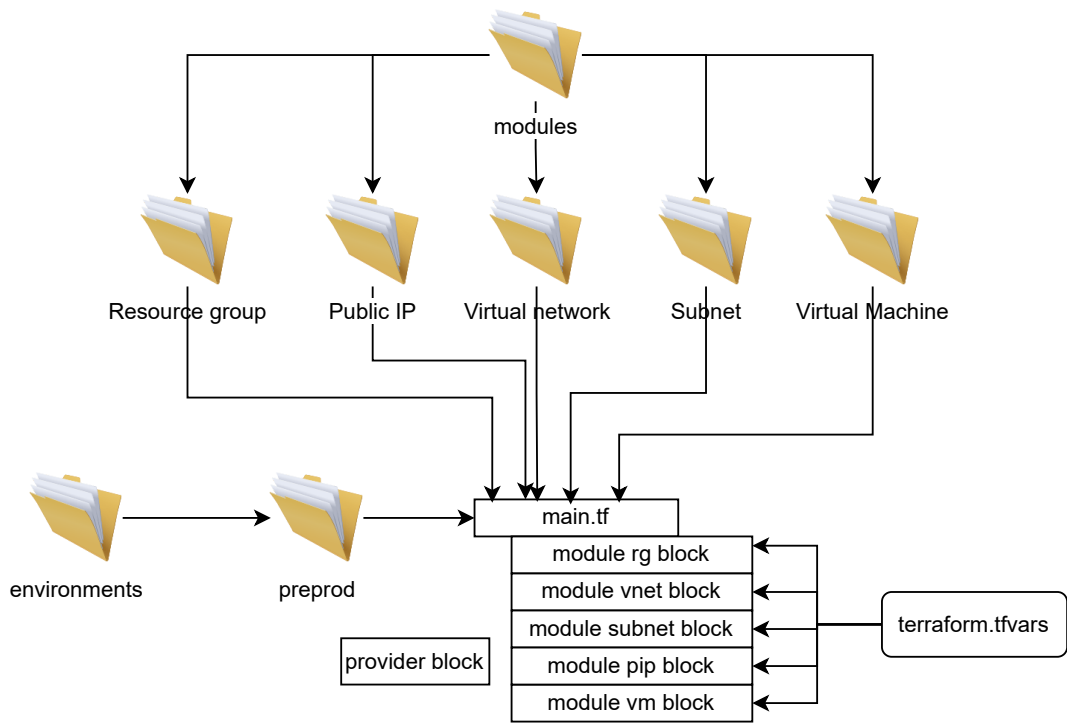

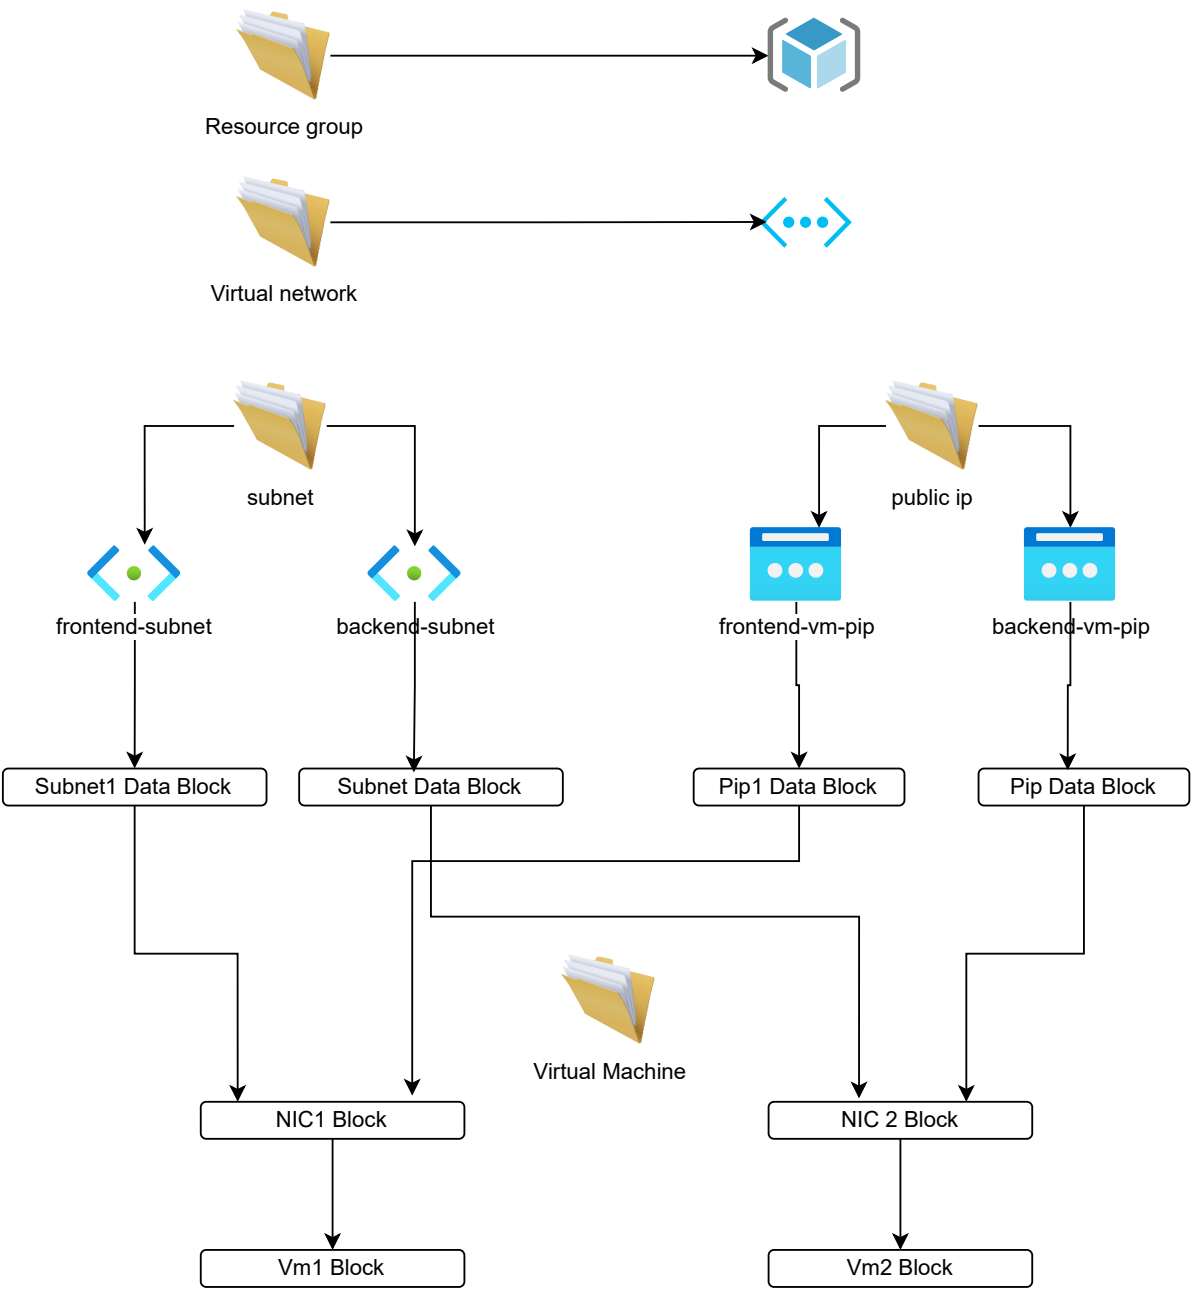

Secret Scanning Tools

creation of keyvault

Store username/passwords

VM ke code ko data block se optimize karke secret.tfvars se hataenge

Fir se scan karenge aur secret nahi aaega toh mast so jaenge

How to use any tool?

1. Install Tool

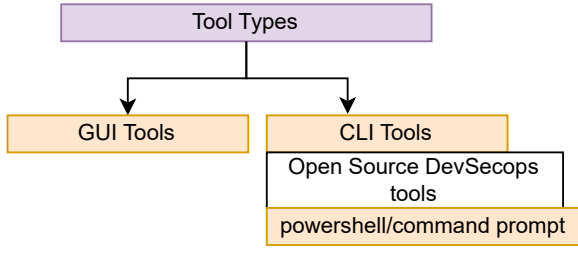

2. Koi bhi tool ka readme.md file hota hai usko padna hai deeply

3. Code ke folder me jana hai aur kuch to command chalana hai

4. It will generate report

How to install and How to use?

How to install any tool?

terraform tool

1. terraform.zip -> terraform.exe

2. Ek folder me rakhke PATH environment variable set kr dia tha

gitleaks cli tools

1. gitleaks.exe - ye diwa do kahi se

2. folder me rakhke PATH variable me set krdoge

Jo bhi tool Ki exe chahiye..

Aapko us tool ki github repo pr jana hai -> waha pr releases page me jana hai aur releases me aapko apne os ki file mil jaegi..

Steps to install any tool

1. Open GitHub page for that tool

2. go to Releases page

3. Find apne os ka zip ya jo bhi file hai

4. us zip ko extract krke .exe nikalo

5. .exe ko nilkal ke ek folder me dalo

6. us folder ke path ko environment variable me PATH me jake set kardo

7. Terminal khol ke jb vo tool ko bulaoge toh vo tool chline lg jaega

Steps to use any cli tool

1. tool --help open karo

gitleaks dir

Jo bhi chokor dabbe me hai vo sb optional hai
