

Regular question - Kya aap apni mehnat pr fida hai?

Hame 4 rg banana hai list as a input, location same rhega

Hame 4 rg banana hai map as a input, location different rhega

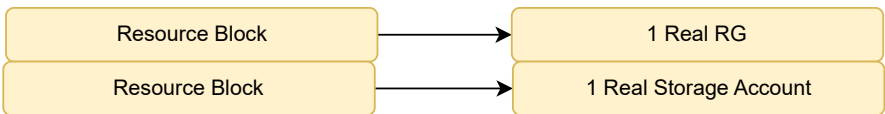

Jab jab code me duplicacy hogi, tab tab code ko optimization ki need hogi..

```
resource "azurerm_resource_group" "rg1" {
  name     = "rg-dhondhu"
  location = "westus"
}

resource "azurerm_resource_group" "rg1" {
  name     = "rg-tondu"
  location = "westus"
}

resource "azurerm_resource_group" "rg1" {
  name     = "rg-rondu"
  location = "westus"
}
```

The `for_each` meta-argument accepts a map or a set of strings

list - Duplicates ho sakte hai

rg_name = ["rg-dhondhu", "rg-tondu", "rg-tondu", "rg-rondu", "rg-rondu"]

set - Duplicates nahi hai

rg_name = ["rg-dhondhu", "rg-tondu", "rg-rondu"]

Set of Strings

rg_name = [56, 87, 59, 32]

Set of Numbers

```
resource "azurerm_resource_group" "rg" {
  for_each = toset(["rg-dhondhu", "rg-tondu", "rg-rondu"])
  name     = each.value
  location = "westus"
}
```

1. rg-dhondhu

each.value = rg-dhondhu

```
resource "azurerm_resource_group" "rg" {
  name     = "rg-dhondhu"
  location = "westus"
}
```

2. rg-tondu

each.value = rg-tondu

```
resource "azurerm_resource_group" "rg" {
  name     = "rg-tondu"
  location = "westus"
}
```

2. rg-rondu

each.value = rg-rondu

```
resource "azurerm_resource_group" "rg" {
  name     = "rg-rondu"
  location = "westus"
}
```

Abhi sare rg ek hi region me bana rahe

ForEach + list isme fail ho jaega

Isko solve karne ke lie foreach + map aa jaega.

HR

Introduction 70 baar bol bol ke record karna hi hai..

Naukri.com ko har din me do baar update karna hai.. bhale hi bs ek dot laga ke remove kardo..

HR ke samne bindaas fekna hai... HR ko kuch nahi aata... Jo bologe vo maan legi/lega..

Jo bhi choti company jinka naam nahi sune ho un sab me interview dena hai..
